TRS conduits

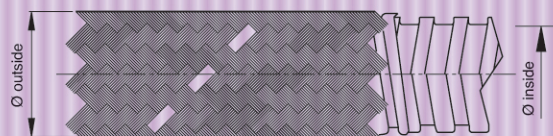

Simple hemming galvanized steel conduit, with outer casing of galvanized steel braid. Suitable for all high fire hazard environments, thanks to its lack of plastic materials.

Dimensions

Characteristics:

material: Flexible galvanized steel (FeP01-02) PVC covered. Outside galvanized steel braid.

temperature rating: -15°C +60°C

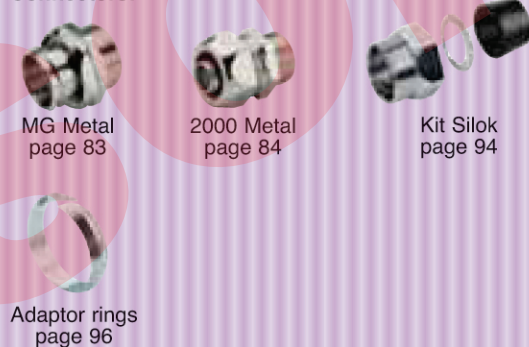

classification CEI EN 50086 : 3 3 5 6

self-extinguishing: non-flame propagating according to CEI EN 50086

index of protection: IP42 with MG Metal connectors
IP42 with 2000 Metal connectors
