

Type 1001T Panel Gauge

FEATURES

- Available in 1½", 2", 2½" and 3½" dial sizes
- Standard panel-mounting with U-clamp design — front flange mounting available for 2" and 2½" gauges
- Attractively designed ¼ turn polycarbonate window for better visibility and easy removal
- Patented PowerFlex™ movement with polyester segment
- True Zero™ indication, a unique safety feature

Ashcroft® panel gauges offer attractive design, excellent readability and a variety of dial sizes with a broad pressure range selection.

These gauges utilize a U-clamp mounting design. An optional front flange mounting design is available in 2" and 2½" gauges.

Ashcroft panel gauges are available in a black steel case with a ¼-turn threaded polycarbonate window.

The patented Ashcroft PowerFlex™ movement incorporated in these gauges resists the effects of shock, pulsation and vibration.

True Zero™ indication, a unique safety feature standard on these gauges, is the accurate indication of zero pressure being applied to the gauge. In addition to the increased safety benefits, this means reduced inspection and manufacturing costs for you or your customer.

COMMONLY USED ON

Instrument panels, air conditioning equipment, air and gas dryers, compressors, pressure test stands, machine tools, a variety of other applications
