

## APT-1 Pressure Tester

 For calibration, test and measurement applications requiring very high accuracy secondary transfer standards

### **FEATURES**

- · Simultaneously display the output of two pressure sensors, two RTD's or one of each
- 12 standard user selectable engineering units and one custom value.
- Dedicated front panel buttons to set zero, check max/min values, adjust measurement damping, select either or both ports for standard display, additive or differential display, print the display and configure the RS232 output. All front panel features are accessible via the RS232 port for remote configuration or data acquisition

The PT indicator is an extremely versatile pressure measurement and test instrument. Each PT indicator provides the ability to select any of eight factory programmed engineering units, monitor and display minimum and maximum pressure values, program damping, tare out displayed measurement values and communicate over the standard RS232 interface. In addition to a broad variety of pressure ranges and types, the PT indicator can be supplied with temperature input modules.

These modules provide compatibility with platinum RTD Pt100 or Pt1000 probes. The modules accommodate 2. 3 and 4 wire configurations. All these capabilities are accessible through easy-to-follow keypad functions as well as over the RS232 interface.

Optional features such as the addition of a second sensor assembly, a backlit display or a built-in rechargeable battery pack make the PT indicator the ideal measurement tool for most major pressure measurement applications.

### **PRODUCT SPECIFICATIONS**

Accuracy: ±0.1% of span ±0.25% of span ±0.05% of span **Optional Special Calibration:** 

- Eliminates temperature error from 20° to 120°F.
- Calibration: (Traceable to N.I.S.T.) Recalibration: Complete recalibration can be accomplished over instrument RS232 interface. Zero and span can be accomplished via front panel keypad.
- **Resolution:** ±0.002% of span (max)
- Repeatability: (typical)
  - ±0.01% of span (all psi ranges)  $\pm 0.01\%$  of span, (ranges of 1" through 200" H<sub>2</sub>O) ±0.02% of span, (ranges below 1" H2O)
- Pressure Types: gauge (sealed gauge over 300 psi), absolute, compound, differential and vacuum (as noted in range chart)
- Temperature Effect (zero & span): ±0.004% per °F from a reference temperature of 70 ±3 °F
- **Operating Temperature Range:**
- 32-120° F (0 to +49° C) Temperature Compensation Range:
- 20-120° F (-7 to +49° C)
- Storage Temperature: -4 to +158° F (-20 to +70° C)
- Warm up:
  - 5 minutes to rated accuracy
- 30 minutes to complete stability

### Standard:

Inches of water ranges and psi ranges of 5 to 300 psi: clean, dry non-conductive and non-corrosive gases. Ranges above 300 psi: liquids and gases compatible with 316 SS.

### Optional:

316 SS isolation available for ranges from 10-300 psi.

### Overpressure:

- Inches of H<sub>2</sub>O ranges
- 50 psi positive, 15 psi negative psi ranges 200% for ranges of 5 through 1000 psi
- 150% for ranges of 1500 psi and above

# The front panel keypad provides access to the following standard features:

- Push button zero adjust
- Engineering unit select (12 standard)
- Push button tare function
- Push button max/min memory recall
- Pressure/temperature port select (left, right, both)
- Port addition, subtraction (for DP calculation)
- · Selectable dampeneing of input pressure
- Serial output port configuration
- Display hold
- Push button print
- Display: Liquid crystal

### Display Size: 2 line, 0.38 inch height per line, 16

- alpha or numeric characters/line (max)
- Display Update: 100 ms
- Pressure Connection: 1/8 NPT internal Dimensions: 7.72" x 6" x 2.95" (l x w x h)
- Panel Cutout: 5.4" x 2.68" (w x h)
- Weight: Will vary based on sensor type and number
- of sensors installed. Total weight less than 4 lbs with 2 sensors and battery option. Case Material: High Impact ABS, black
- **Power Requirements:** 
  - Standard: ac adapter provided for operation off standard 110 Vdc, 60 Hz supply
